1 Mail Backup Report

Recommended documentation

Doc-Tab	Title
Reports	Backup Report

There is a complementary executable available to mail the Backup Report from one of the QGrip Servers.

A smtp client is needed and the ini file must be adjusted and placed in the same directory as the executable. The QGrip System Account (gMSA_QGrip\$) must be authorized for the directory where the executable and ini-file are placed.

A zip file with the executables, the ini-files and the scripts below can be downloaded from the QGrip database from the QGrip setup on one of the QGrip Servers. The zip-file also contains the executable/ini-file for the external Monitoring.

To add a task to the task scheduler, edit the following piece of code, and run it on the QGrip Server in a PowerShell window as administrator:

```
#####
# Backup report at 07.00 every day
#####
$action = New-ScheduledTaskAction "D:\Apps\QGrip-Monitor\QGrip-Monitor-Mail-BackupReport.exe" -WorkingDirectory "D:\Apps\QGrip-Monitor"
$trigger = New-ScheduledTaskTrigger -Daily -At 7am
$principal = New-ScheduledTaskPrincipal -UserID AD\gMSA_QGrip$ -LogonType password
$settings = New-ScheduledTaskSettingsSet -ExecutionTimeLimit (New-Timespan -Minutes 5)
Register-ScheduledTask -TaskName QGrip-Monitor-Mail-BackupReport -TaskPath "\QGrip" -Action $action -Settings $settings -Trigger $trigger -Principal $principal
```

Extra Parameters

Start of day	<input type="text" value="06:02"/>
Generate report at	<input type="text" value="06:10"/>
Next run after	<input type="text" value="2021-01-29 06:10"/>
Send mail to all QGripAdmin	<input checked="" type="checkbox"/>
Email addresses other report receivers (separated by comma)	<input type="text"/>

The mail can be sent to all QGrip-Admins and/or an additional list of receivers.
Admin -> Config -> Parameters -> Generate Backup Report

Note

At the first day of the month, an extra report will be mailed. The extra report covers the last month.
