# **OGRIP-UI - TRACE MENU**

## 1 Introduction

This document describes all items in the Trace Menu of the QGrip-UI.

QGrip saves certain actions and changes to trace tables. The records in the Trace tables can be viewed under the Trace Menu.

Required QGrip Role	Menu
QGrip-Admin	Trace

#### **Recommended documentation**

Doc-Tab	Title
Reports	Trace Reports

Note that the Admin menu will only be visible for QGrip-Admin users and all Menu-Items will be enabled.

## **OGRIP-UI - TRACE MENU**

### 2 Trace Window

The layout of all trace windows is the same.

#### **Use Filter**

Checking "Use Filter" will allow you to narrow down your search result by selecting a certain item.

#### **Use Period**

When "Use Period" is unchecked, the Begin and End period parameters are ignored. This might result in a lot of record, so handle with care.

#### **Exp2CSV Button**

Exports the content of the Active tab to a CSV-file. A dialog will be opened where you can choose file name and location.

#### **Details Button**

Opens a window with the content for each row currently selected. The content can be saved to a text file.

#### Tabs

The visible Tabs depend on the different trace types and is described in the next sections.

#### Inserted, Deleted, Updated

If the tabpage data contains a chronological trace, the [Action] column will contain and indication whether the record has been Inserted, Updated or Deleted.
